

The Ecology School Pre-Visit Information Sheet

Now that you and your students are beginning the final preparations to come to The Ecology School, please take a moment to fill out this sheet and get it to us the Wednesday before you arrive. We will share this information with our educators at our staff meeting before your arrival to help them plan lessons and ensure that your students get the best program for their learning and experience level. If you have any specific curriculum needs or behavior challenges, please don't hesitate to be in touch by phone or email.

1. Your name _____ Your role: _____
School _____

2. What topics are covered by your science curriculum this year? Will these topics be covered before or after your visit to The Ecology School?

3. Are there any particular concepts or subjects you would like our educators to focus on?

4. Have you had the opportunity to use any of the activities in the Pre-Visit Activity booklet or the ABC's of Ecology curriculum guide? If so, please tell us which ones so that our educators do not repeat those activities in their lessons and can refer to them in their lessons.

5. Will the students have any classroom-related projects, such as a journal or data collection, to be working on while they are here? Are there any projects you will be having them do once they are back at school that they should be thinking about while here?

6. What do you think your students are most excited about in anticipation of their week at The Ecology School? Most nervous about?

Thank you for your time in answering these questions. The answers you provide will help our staff develop lessons specific to your school's needs. We look forward to seeing you soon!
